

Telegraphic Address—
BARR, COVENT GARDEN, LONDON.

AUTUMN 1898.

BARR'S Gold Medal DAFFODILS.

BARR'S DAFFODILS won the ONLY GOLD MEDAL at the first Great Daffodil Conference, the Premier Prize at the Birmingham Daffodil Show, 1894, and the Gold Medal of the Wolverhampton Show, 1896.

BARR'S EXHIBITS have been awarded 10 Gold Medals, 25 Gold-Gilt Medals, 129 Silver Medals, and 3 Silver Cups, in addition to many Special Prizes, Bronze Medals, Certificates of Merit, &c.

A GROUP OF 'ANGEL'S TEARS' DAFFODILS. (*Copyright.*)

(N. triandrus albus.) See page 21.

BARR & SONS,
12 & 13 King Street, Covent Garden, London.

Nurseries—LONG DITTON, SURREY, a few minutes from Surbiton Station (S.W.R.) Visitors invited to the Nurseries during Spring, Summer, and Autumn to see BARR'S DAFFODILS, IRISES, PEONIES, SUNFLOWERS, MICHAELMAS DAISIES, and other HARDY HERBACEOUS, ALPINE, and BULBOUS PLANTS. A Fine Display of CUT FLOWERS is maintained during the Season at 12 and 13 King Street, Covent Garden, London.

Entered at Stationers' Hall.

All rights strictly reserved.

Barr's Gold Medal Daffodils.

BARR'S DAFFODILS.

THE FAVOURITE HARDY FLOWERS OF SPRING.

DAFFODILS are the most graceful and beautiful of all Hardy Spring Garden Flowers, and withstand uninjured our severest winters better than any other flower. The cut blooms are always acceptable, and are in abundance out of doors at a season when other flowers are scarce. They supplement and associate admirably with hot-house flowers.

BARR'S DAFFODILS have been Awarded A MULTITUDE OF MEDALS (Gold, Silver-Gilt, and Silver), PRIZES AND CERTIFICATES, including the only GOLD MEDAL of the Great Daffodil Conference of the Royal Horticultural Society, April 15, 1890, and the GOLD MEDAL at the Wolverhampton Spring Show, April 9, 1896.

Numerous AWARDS and FIRST-CLASS CERTIFICATES have also been given to individual varieties.

PRESS NOTICES OF BARR'S DAFFODILS, 1898.

Extract from the 'Journal of Horticulture,' April 21, 1898.

'DAFFODIL LAND.'

'Some readers may imagine from the above title that these notes will deal with Daffodils in Spain and Portugal, or in the Isles of Scilly. Such, however, will not be the case. *The Daffodil Land* of which mention is now about to be made is much nearer home; indeed, it is within a dozen miles of our great metropolis. What need is there now to say that the title is applied to the Long Ditton Nurseries of Messrs. Barr & Sons? None at all. It is, indeed, Daffodil Land, as all travellers on the S.W.R. main line know so well, for there are millions of bulbs producing more millions of flowers. A glorious spectacle indeed is this. The eye wanders over waving masses of golden Daffodils—some large, some small, but all beautiful as well as useful for the adornment of our gardens and homes during April and May. Who does not admire the "nodding Daffodil"? Everyone, beyond a doubt. Then let all who can visit these grounds at once, and they will still be in time to see thousands of flowers of more than passing beauty.

'Though the headquarters of the firm are in Covent Garden, one of the chiefs, Mr. William Barr, can almost invariably be found at Ditton, and a walk through the nurseries in his company is more than interesting—it is instructive. Familiar with the geography of the Narcissus, he can tell where this variety is found; where another was discovered by his father, Mr. Peter Barr; and what with the conversation and admiring the many varieties, the time will pass all too quickly.

'As an example of the magnitude of the stock held by the firm it may be noted that in one mass there are upwards of 50,000 bulbs of *Barrii conspicuus*, and this does not represent more than half the number of this variety alone. True, it is one of the most popular Narcissi in cultivation, but the example is a fair one nevertheless, for all others are as large in proportion to their popularity. In all there are 17 acres under cultivation, of which the major portion is devoted to Daffodils. Though we occasionally hear of disease among Narcissi, the plants at Ditton are healthy and vigorous, and produce flowers of splendid substance and very rich in colour. It is possible they have never been better than this year in these two respects, and if excellent top growth may be taken as a criterion, the bulbs will be of the best quality when they are lifted.

'A FEW OF THE CHOICER VARIETIES.

'If we take the choice and new varieties into consideration it would be quite safe to say that nowhere can such a collection be found. Others have some of them perhaps, but no one in such numbers as those

of Messrs. Barr. It is an open question whether the premier position ought to be accorded to **Monarch** or to **Weardale Perfection**—that is to say, of the named varieties, for there is an unnamed bicolor that is distinctly superior to either. Of this more will probably be heard another season when it has been properly tested. **Monarch** is yellow both in the immense trumpet and in the perianth segments, while **Weardale Perfection** is equally large, but is a bicolor having broad white perianth segments. They are superb—both monarchs of their respective colours. Let no one order rashly of these two, however, for the modest sum of 15 guineas is the catalogue price for one bulb of the former, while the latter can be had for 10 guineas. We are inclined to think that twenty years ago a Daffodil at 10 guineas per bulb would have received scant attention, but now it is not only asked, but readily enough obtained.

'**Apricot** is a distinct novelty, and one which hybridisers of Narcissi will hail with pleasure, as the trumpet shows distinctly a shade of red in the yellow ground colour, thus imparting unusual richness to the flowers; the perianth is white, and the flower is medium sized. **Lady Helen Vincent**, which, with the last named, received an award of merit from the Royal Horticultural Society on the 12th instant, is a handsome variety of the style of **Emperor**. The flowers are large, very substantial, and clear in colour, while the habit of the plant is dwarf. A beautiful bicolor is **Victoria**, which may be succinctly described as an improved **Empress**. The flowers are of great substance, and the bulb is a strong grower. Another handsome variety is **Fred Moore**, of which the broad perianth segments are pale yellow, and the deep, sharply trumpet clear yellow. **Mrs. Walter Ware** is the name of a very attractive bicolor. The perianth is pure white, and the filled trumpet golden-yellow. This variety is a free yet dwarf grower, and a profuse flowerer. The stately **Glory of Leyden** is now comparatively well known, as is the showy **Gloria Mundi**, which belongs to the incomparabilis section, and is conspicuous mainly by reason of its brilliant orange crown. With **Remarquable** the list of newer ones must close; it is of dwarf habit, and the colour of the broad-mouthed trumpet is very rich yellow; the perianth segments are much paler.'

'SOME OLDER VARIETIES.'

'Amidst the host of older varieties there are some that still stand above the remainder, such, for example, as **Emperor**, **Empress**, **Sir Watkin**, **Barrii conspicuus**, **Horsfieldii**, and **maximus**, all of which ought to have a place in every garden where Narcissi are appreciated. **Golden Spur**, a beautiful form of **maximus**, and **P. R. Barr**, a rather small variety of **Emperor**, must not be overlooked, any more than should **Bicolor Grandis**, which is so valuable for late flowering. The lovely **Johnstoni** **Queen of Spain** will long remain popular, as will **M. J. Berkeley**, **J. B. M. Camm**, **Michael Foster**, and **Princeps**. Of the lighter forms, of which **Moschatus** and **Cernuus** may be quoted as typical, the best include **Cecilia de Graaff**, **Exquisite**, **Pallidus præcox**, **William Goldring**, and **W. P. Milner**, with **Snowflake**. These are a few of the many large trumpet varieties that are to be seen in such good condition at Ditton, and all of which are well worthy of a place in every collection.

'Of the incomparabilis, one has been named as a standard variety—namely, **Sir Watkin**, to which we might advantageously add **Beauty**, **C. J. Backhouse**, **Frank Miles**, **Goliath**, **Queen Bess**, **Princess Mary**, and **Autocrat**, as being above the average of merit. Besides **Barrii conspicuus**, **B. Sensation**, and **B. Maurice Vilmorin** must be grown; while **Leedsil—Gem**, **Grand Duchess**, **Katherine Spurrell**, **M. Magdalene de Graaff**, **Minnie Hume**, and **Mrs. Langtry**—ought not to be forgotten.

'And so one might go on enumerating charming single varieties to the exclusion of the doubles, amongst which the common double Daffodil still stands pre-eminent. But we must stop. Those who would learn more or see those mentioned must go to Ditton at once, or the chance of admiring them will be gone for yet another year.—DAFF.'

Extract from 'The Garden.'

NEW AND CHOICE DAFFODILS AT LONG DITTON.

'... Here the finest of the race may be seen, many of them towering high on giant stems well-nigh 2 feet long, bearing aloft their noble blossoms that in many instances are unique. Chief among this category are such as **Weardale Perfection** and **Monarch**—splendid acquisitions that will be many years before they are cheap. Both these are grand in their way. Some single bulbs of the latter were carrying five monster blooms. Quite near these came the handsome yellow trumpet **Fred Moore**, a novelty of last year, also a massive kind of great vigour. This, however, has now a close companion in **Lady Helen Vincent**, a fine kind that only obtained its certificate of merit on April 12 last. This will make a fine addition to the trumpet class. **Apricot**, also a present-year's novelty, was noticed. This distinct kind obtained the award of merit chiefly for the break in colour, a buff-orange tone having been imparted to the trumpet, which thus opens out a new field to the hybridist.

'Still among the very choicest of the more recent bicolor kinds is **Mrs. Walter Ware**. Its chief merit is in the pearly white of the perianth and in the full-toned yellow trumpet so beautifully reflexed at the brim, and in all respects possessing rare finish. A bed of this with some 200 in full bloom we

regarded as among the very finest at the moment of our visit. Possessing a good constitution, this is a kind that will be sought after much in the future, when a selection of Daffodils of the highest standard of excellence becomes a necessity. Another very fine display was created by **Victoria**, also a bicolor Daffodil, which may be said to belong to the Glory of Leyden group in so far as the shape of the trumpet is concerned, that is to say, a trumpet, slightly widening at the rim and beautifully frilled, but not recurring; the segments of the perianth creamy white, and broadly overlapping, and the whole flower very solid and sturdy-looking. Not less bold and telling are **Golden Queen** and **Golden Nugget**, both novelties of last year of the self-yellow class, and with the fine bold character and sturdy qualities of Emperor in the foliage and growth generally. Another very handsome form, still scarcely without equal, is **M. J. Berkeley**, the colour that of *Maximus* in a flower of greater and, indeed, nobler proportions generally. The huge flange-like rim of this kind, broadly reflexed and beautifully as well as heavily frilled, renders it at once conspicuous. Other beautiful novelties are **Grace Darling** and **Lady Somerset**. Here, too, we find the lovely **Mme. de Graaff**, the most prominent of this fair race of Daffodils. **Matson Vincent**, **Mrs. Thompson**, **Mrs. F. W. Burbidge**, with **Mrs. J. B. M. Camm**, are other gems in this section that satisfy and fascinate most lovers of the flower, and constitute the very cream of the white and sulphur sorts.

'THE CHALICE-CUPPED NARCISSI.

'It is among these that the remarkable **Gloria Mundi** shines out so well and so conspicuously, the rich orange-stained eup being of large size and well expanded. **C. J. Backhouse** is of the same hue, but a smaller flower and much earlier, while other notable kinds include **Commander** (a novelty of 1896), **Goliath**, **Gwyther**, and **Autocrat** (a distinct form of excellent habit and very vigorous). **Beauty** also is a conspicuous kind, showing well among the hosts of these kinds.

'Among the newer kinds of *Barrii*, **Dorothy E. Wemyss** is exquisite. **Flora Wilson** is also an extremely pretty flower, the segments so very pure. Another very beautiful kind is **Maurice Vilmorin**, with a cup heavily stained with orange-scarlet. **Siddington**, a variety of 1896, is also free and good, and frequently produces twin flowers in a scape. Of course, there is the world-renowned **B. conspicuus**, perhaps the most deservedly popular of all the *Barrii* strain. It is to be seen in the open fields by many thousands in a batch. In one quarter alone there were just fifty beds of this, and each bed contained 1,000 bulbs, a similar lot gracing what is known as the New Field—a valuable adjunct of many acres devoted to blocks of the most popular sorts.

'Perhaps one of the fairest sights among Daffodils—certainly in the writer's opinion—was the beds of **Leedsii Duchess of Westminster** and **Mrs. Langtry**, then a mass of nearly pure white, exquisitely crimped flowers, the biscuit-toned cups in some of these being charming against the pearly delicacy of the perianth. **Minnie Hume**, **Princess of Wales**, **Katherine Spurrell**, and **Beatrice** are all good and distinct among these, and worthy every care. One other kind, and this a Poet's Narcissus—**N. poeticus poetarum**—was very fine indeed, many handsome flowers just opening.

'The above naturally only represent a very few kinds out of some 20 acres of these flowers, some of the kinds, as, e.g., **Barrii conspicuus**, appearing in overwhelming numbers, and, as viewed from the upper end, revealed not less than 70,000 or 80,000 of its handsome and graceful flowers; large numbers of bulbs bearing three and others even four flowers each—truly a wondrous sight.' E. J.

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

SOIL.—The Daffodil will thrive in any ordinary loamy garden soil, but prefers a deep, rather moist loam, and dislikes peat. When the soil is of a dry sandy nature, it should be deeply dug, rotten stable manure should be added, and a potato or other crop be taken off before planting. If this is not convenient, then place the manure at least 12 inches deep, so as to be out of the reach of the bulbs; the manure is used not as a stimulant but as a sponge to hold moisture in the soil. The ammoniacal properties of manure are poison to the Daffodil, hence great care is necessary in the use of it.

FRESHLY DUG SOIL should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are often drawn under considerably below their proper depth, and the bloom in consequence is weakened.

BEST AND SAFEST MANURE TO USE is Crushed Bones or Basic Slag (for price see page 24). This should be applied at planting time, and may be mixed with the soil and placed next the bulbs; the Crushed Bones may be applied at the rate of 4 cwt. to the acre, or 1½ oz. to the square yard, and Basic Slag may be applied in same manner at the rate of 1 ton to the acre, or 7½ oz. to the square yard. *We recommend the Basic Slag in preference to the Crushed Bones, it being more reliable*, and a good manure for all lands; on very poor and DRY SANDY SOILS we recommend in addition **SULPHATE OF POTASH** (for price see page 24), to be sprinkled annually over the surface of the ground, after planting, at the rate of 2 cwt. to

the acre, or about $\frac{3}{4}$ oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold the moisture in the soil, a condition so essential to the perfect development of the Daffodil.

IN EARLY SPRING, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains.

TIME OF PLANTING AND LIFTING.—The best time to plant to obtain the finest flowers is September, *although bulbs may be planted as late as Christmas with very satisfactory results.* They may be left undisturbed for three years in ordinary good loamy soils, but on poor and light soils they are better lifted every two years, as soon as the foliage has died down, and replanted as early as is convenient.

DEPTH TO PLANT.—The average depth to plant is from 2 to 3 inches, that is to say, a covering of two to three inches of soil, but not more. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be *covered with soil once and a half its own depth*, measuring the bulb from the collar of its neck to its actual base.

POSITION AND GROUPING FOR BEST EFFECT.—All Daffodils prefer partial shade, although most of them will grow equally well in the open. The varieties which are best grown in partial shade are indicated in the following pages by an *. In grouping in the flower border to obtain the best effect, they should be massed together in as large and as irregularly shaped groups as possible, avoiding straight lines or circular and symmetrical clumps. Masses of Daffodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Daffodil foliage while it is going to rest. In grouping, the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period a constant succession of flower is obtainable by a judicious arrangement. In the following pages we denote the rotation of blooming, thus: (1) = 1st early; (2) = 2nd early; (3) = mid-season; (4) = the latest blooming.

VARIETIES SPECIALLY SUITABLE FOR NATURALISING IN GRASS, WOODLANDS, &c.—These are all free seeders, and will therefore spread naturally; they are mostly natural hybrids—Abcissus, Achilles, Countess of Annesley, Golden Spur, Henry Irving, Obvallaris, Spurius, Thomas Moore, Cambricus, Camoens, English Lent Lily, Princeps, Variiformis, Albicans, Pallidus Præcox, Moschatus of Haworth (very pretty in grass), and Poeticus of the Pyrenees. THE VARIETIES UNDERLINED we do not recommend for the cultivated border, as they deteriorate the second year, while in grass or meadowland they flourish.

HINTS ON NATURALISING IN GRASS.—All daffodils may be planted in grass with perfect success. To produce the best effect the three groups should be kept separate: thus the Star Narcissi should not be mixed with the Great Trumpets, nor the Poet's Narcissi with the Star Narcissi. In arranging, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and dibbling into the ground where they fall. Avoid symmetrical lines or formal circles as far as possible, as these are never found in nature.

METHOD OF PLANTING IN GRASS.—Take a stout wooden dibber with a strong tread; make the hole in the ground about six or seven inches deep, and fill up with a good mixture of prepared soil consisting of two-thirds loam and one-third old leaf soil; into this press the bulb, and cover up the hole with same compost; this will give the bulbs a fair start, and success is sure to follow. In planting under trees, avoid places where the drip from the leaves &c. is greatest, also where the main roots come close to the surface.

CULTURE INDOORS IN POTS, &c.

Of the stronger growing sorts use three to six bulbs, according to size of bulb for a $4\frac{1}{2}$ to 6-in. pot; of the small growing kinds such as N. Minimus, Nanus, Minor, Cyclamineus, Triandrus, Juncifolius, and Corbularias use twelve to eighteen bulbs for a $4\frac{1}{2}$ to 6-inch pot. These small-flowered dwarf-growing species are most charming in pots or little shallow pans. The following may easily be had in bloom in January—N. minimus, minor, nanus, and Cyclamineus, and these may be mingled with Chionodoxas, as both bloom at the same period and produce a charming contrast. The White Hoop Petticoat Narcissus should be potted in almost pure sand kept well moist, and may be had in bloom shortly after Christmas. (See Rock Garden Collection of Daffodils, page 7.)

If Daffodils are wanted in quantity for cutting early in the season, plant thickly in boxes five to six inches deep, and only just cover the bulbs with soil, using ordinary potting soil. The pots or boxes should then be placed out of doors on a firm bottom such as a bed of ashes or a gravel path and be covered with six inches of ashes or cocoa-nut fibre. When the bulbs have filled the pots or boxes with roots and made an inch or two of top growth, portions should be removed indoors in succession, selecting first those which flower naturally early. They should be first placed in a cold frame or cool greenhouse and then shifted to a slow forcing house when they should have abundance of water and plenty of air. The plants should be kept as near to the glass as possible, and not allowed to get drawn from an insufficient supply of light or air.

BARR'S DAFFODIL PRIZES for SPRING 1899.

For particulars, see back cover.

SELECTIONS OF**Barr's Beautiful Daffodils**
FOR AMATEURS.**BARR'S Popular 21/- Collection of High Class DAFFODILS,**

Consisting of the following fine distinct varieties, selected from Groups I., II., and III., and suitable either for pot-culture or for the flower border.

ALL STRONG BULBS.

DAFFODIL SEED FOR AUTUMN SOWING.

CHOICE MIXTURE saved from our magnificent Collection, per pkt., 1/- & 2/6.

FINE MIXED, saved from all kinds, for sowing in grass, woodlands, &c., where the seedlings will naturalise themselves without further troubleper pkt. 3d. & 6d.

Beautiful New Daffodils 1897 & 1898.

each—s. d.

ALVAREZ , a dainty little flower resembling a highly refined miniature <i>Emperor</i> , and not exceeding six inches in height, a free strong grower.....	per doz. 21/-	2 0
APRICOT , a very beautiful and striking novelty, presenting quite a new shade in Trumpet Daffodils. The perianth is white, while the long straight trumpet is of a soft apricot-buff shade and exhales a delightful fragrance resembling that of violets. <i>Awarded by the R.H.S. Daffodil Committee an Award of Merit</i> , April 12, 1898		30 0
BORDER MAID (Nelsoni) , new 1898, a beautiful seedling raised by Dr. STUART, of <i>Chirnside</i> , large pure white perianth of great substance, long clear yellow well-formed cup, a good grower, and a valuable acquisition		21 0
CORRIE PLEMP , a chaste and beautiful flower, perianth white, trumpet delicate primrose, passing off white, a free and strong grower		15 0
FRED MOORE , a grand large Trumpet Daffodil of great substance, large broad primrose perianth, with an immense stiff deep golden trumpet, wide and elegantly frilled at mouth, a strong sturdy grower. <i>Award of Merit R.H.S.</i> , April 27, 1897.....		21 0
GOLDEN NUGGET , a handsome Daffodil, with a very rich deep golden-yellow trumpet, exquisitely frilled at the mouth, and with the substance of <i>Emperor</i> , a strong sturdy grower ...		30 0
GOLDEN QUEEN , large bold flowers of a uniform soft clear yellow, trumpet much expanded at mouth and deeply flanged, a grand Daffodil of remarkably elegant form, best grown in half-shade		30 0
GRACE DARLING , perianth white, gracefully twisted and overlapping the elegant trumpet, which is of a pale primrose, passing to white, very beautiful, a free and strong grower.....		15 0
JOHN DAVIDSON (Bicolor) , a beautifully formed flower, with large creamy white perianth, and large clear yellow trumpet, with mouth well open and gracefully frilled, a strong grower...		5 6
LADY HELEN VINCENT , new 1898, a very large trumpet variety of highly refined build, colour of a uniform soft clear yellow, a good strong healthy grower. <i>Received an Award of Merit by the R.H.S. Daffodil Committee</i> , April 12, 1898.....		105 0
LADY SOMERSET , a fine tall white Trumpet Daffodil, with straight trumpet and gracefully twisting perianth, a good grower		10 6
L'INNOCENCE , new 1898, very beautiful, broad straight trumpet, of a pale primrose passing to white, perianth white		25 0
LORD ABERDEEN , broad handsome primrose perianth of good substance, bold, bright golden-yellow trumpet, a free and strong grower		6 6
MISS WHITE (Tridymus) , new 1898, each stem bearing three to four elegant silvery white flowers		15 0
MRS. E. G. KNIGHTS (Nelsoni) , new 1898, broad solid white perianth and bold stiff bright yellow cup, handsome.....		12 6
MRS. MORLAND CROSFIELD (Bicolor) , new 1898, a large showy flower, remarkably pure in colour, long, bold, clear yellow trumpet and large perianth of purest white, a very beautiful showy flower.....		42 0
MODESTY (Leedsii) , new 1898, long silvery-white tapering perianth, drooping over and much longer than the white cup, very distinct and elegant.....	per doz. 30/-	3 0
PRINCE GEORGE , perianth soft primrose, long soft yellow trumpet, a highly refined flower, and strong sturdy grower		8 6
PROSPERINE , perianth white, shading to a golden yellow at base, and gracefully twisting, large bold deep golden trumpet with open spreading mouth, very showy and free flowering, per doz. 21/-		2 0
RED STAR (Incomparabilis) , new 1898, creamy white, elegantly arched perianth, long straight cup stained brilliant red, very showy		3 6
REMARQUABLE , stiff golden-primrose perianth, trumpet rich deep golden, with open mouth, beautifully flanged and frilled, a very sturdy grower	per doz. 24/-	2 6
SHAKESPEARE , a grand Trumpet Daffodil, which is described by a well-known lover of Daffodils as follows:—‘A magnificent striking flower of great substance, and almost the boldest and most erect of all Daffodils; perianth sulphur-yellow and very broad, trumpet very large deep golden’; a strong sturdy grower. <i>We offer this variety as being superior to Samson which we are omitting from our Catalogue</i>		25 0
STARFISH , a good novelty, very long pointed narrow yellow perianth and short yellow trumpet, frilled at mouth, the flower reminding one of the form of a starfish		5 6
SULPHUR KING , new 1898, perianth pale sulphur-yellow, soft sulphur-yellow straight trumpet, a well-formed and beautiful flower of good substance.....		10 6
VICTORIA (Bicolor) , a grand new Trumpet Daffodil, exhibited by us for the first time, 1897, and highly appreciated by all. The Daffodil Committee of the R.H.S. gave it an <i>Award of Merit</i> , April 27, 1897, and the Royal Botanic Society awarded it a <i>Certificate of Merit</i> , March 30, 1897. The flowers are large, bold and erect, with creamy white perianth of remarkable breadth and good quality; the trumpet is a clear rich yellow, large, broad and of great substance, beautifully flanged and frilled at mouth. It is a very free strong grower. (<i>See Illustration, page 9</i>)	per doz. 36/-	3 6

One bulb each of the above Fine New Daffodils, £21.

MIXED UNNAMED SEEDLINGS, mostly fine Trumpet forms. Purchasers are sure to be pleased with these Strong flowering bulbs, per doz. 7/6 0 8

General List of Barr's Daffodils.

The following list of Daffodils embraces the highest class, and most distinct varieties, surpassing in beauty and diversity all other assortments offered to the public. They represent the cream of our Collection (about 500 kinds), and many are new sorts, which have been offered for the first time from 1887 to 1898. Within the last few years we have discarded many kinds which we considered had been superseded by better sorts, so that all the varieties offered by us are good and distinct.

THE ORDER OF TIME OF FLOWERING.

The relative period of flowering of the different varieties and species we have denoted by means of numbers after the names, thus:

- (1) 1st early, flowering from February to early March.
- (2) 2nd early, flowering in March.
- (3) Varieties flowering in mid-season, or early in April.
- (4) Late-flowering varieties, from middle to end of April.
- (5) Very late-flowering varieties, opening in May.

The actual period of blooming depends upon the season and district; thus in early districts (1) would commence in January and early February, while in colder districts end of February or beginning of March; but the natural rotation would remain the same.

FOR ALPHABETICAL INDEX of all the varieties offered in the following list, see page 2 of Cover.

The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

THE ILLUSTRATIONS we give are from Photographs taken at our Daffodil Nurseries, and are intended principally to give a general idea of the form of the flower.

DAFFODILS.—GROUP I.—MAGNI-CORONATI (Baker).

AJAX of Salisbury, Haworth, and Herbert, PSEUDO-NARCISSUS of Parkinson.

THE LARGE-CROWNED or TRUMPET DAFFODILS, INCLUDING ALSO THE HOOP-PETTICOAT OR MEDUSA'S TRUMPET DAFFODILS (CORBULARIA OR BULBOCODIUM).

DISTINGUISHING CHARACTER.—Crown or Trumpet as long or rather longer than the perianth segments.

NARCISSUS CORBULARIA (BULBOCODIUM).

The Hoop-Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration. See *Cultural Notes*, pp. 3 & 4.

LARGE SULPHUR HOOP PETTICOAT (C. citrina) (3), very beautiful pale citron-yellow, early flowering. (See Illustration, p. 10.).....per 100, 5/6
extra strong bulbs „ 7/6

WHITE HOOP PETTICOAT (C. monophylla, or Clusii) (1), winter-flowering, snowy white flowers of exquisite beauty produced in winter, grow in pots, in frames, or at the foot of hot dry wallsper 100, 12/6
extra strong bulbs „ 15/

LARGE EARLY-FLOWERING YELLOW HOOP PETTICOAT (2), found in Spain by Mr. P. Barr, very beautiful, flowering outdoors from February per 100, 16/6

LARGE YELLOW HOOP PETTICOAT (C. conspicua) (4), rich golden-yellowper 100, 25/

SMALL EARLY-FLOWERING YELLOW HOOP PETTICOAT (2), rich yellow, early, and very neatper 100, 3/6

TRUMPET DAFFODILS. Self-Yellow Varieties.

***ABSCISSUS** (4), perianth sulphur-yellow, long rich yellow trumpet, the latest flowering of all Trumpet Daffodils, and valuable to naturalise in quantity in woodlands, &c. per 1000, 45/-; per 100, 5/-

***ACHILLES** (2), perianth light yellow, trumpet rich deep yellowper 100, 6/6

ALIDA, new 1896 (4), long, bold, bright yellow trumpet, perianth soft canary-yellow, and rather twisting; a strong growerper 100, 21/0

ALVAREZ (3). See *New Daffodils*, page 7.

***ARD RICH (syn. Yellow King)** (1), large, full yellow perianth, trumpet large and deep yellow, early. This Daffodil requires shade or planting in grassper 100, 4/0

*JOHNSTONI QUEEN OF SPAIN (2), found by Mr. Peter Barr in Spain. One of the most beautiful, distinct and graceful Daffodils in cultivation, and for bedding unsurpassed. The flowers, which barely rise above the foliage, are of a uniform soft delicate clear yellow, with a gracefully reflexing perianth and straight trumpet of distinct and elegant form; the flowers vary slightly in size, and a few <i>King of Spain</i> may be found amongst them, as in their native habitat the two grow together. Awarded Floral Certificate at the Daffodil Conference, 1896. Visitors to the Royal Botanic Gardens, Regent's Park, during the Spring of 1896, 1897, and 1898 have been charmed with the effect produced by large masses of this beautiful Daffodil, naturalised in grass beneath the trees. VICTORIA (4). See <i>New Daffodils</i> , page 7.			
WEARDALE PERFECTION (4), the largest and grandest of all Daffodils, large white perianth, immense bold trumpet, very pale primrose. Awarded 1st Class Certificate by the R.H.S. 1894, and the Premier Prize as being the 'Finest Daffodil' at the Birmingham Narcissus Show, 1894, and Floral Certificate at the Daffodil Conference, 1896. (See Illustrations in the 'Journal of Horticulture,' April 21st, 1898).....	each, £10 10s.		

TRUMPET DAFFODILS. White and Sulphur-coloured Varieties.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 3).
*The varieties marked thus * require shade; they all prefer a north-west aspect.*

ALBICANS (2), perianth white, trumpet primrose passing to white, elegantly recurved at brim, a strong grower	per 100, 21/-	3 0	0 0	a
APRICOT (3). See <i>New Daffodils</i> , page 7.				
*BISHOP MANN (<i>syn. Cernuus</i>). After growing this variety for several years side by side with <i>Narcissus cernuus</i> we find it impossible to distinguish them; at first, <i>N. Bishop Mann</i> was a shade taller, but eventually became the same height as <i>N. cernuus</i> .

DAFFODILS.—GROUP II.—MEDIO-CORONATI (of Baker).

The Chalice-Cupped Daffodils or Star Narcissi.

QUELTIA, PHILOGYNE, GANYMEDES, &C., OF SALISBURY, HAWORTH, AND HERBERT;
PEERLESS, NONSUCH, &C., OF PARKINSON.

DISTINGUISHING CHARACTER.—Crown or cup half as long as the perianth segments, but in one or two cases three-quarters as long.

The graceful varieties of this group are hybrids, excepting *Triandrus* and *Juncifolius*, which are species. *Incomparabilis* and *Barrii* are the result of garden crosses between yellow Trumpet Daffodils and *Narcissus* *Poeticus*; *Leedsii*, a garden cross between White Trumpet Daffodils and *Poeticus*; *Backhousei*, *Nelsoni* and *Macleanii*, the result of a Trumpet Bicolor var. crossed with *Poeticus*; *Bernardi*, a natural cross between *Abseissus* (trumpet) Daffodil and *Poeticus*; *Tridymus* is a garden hybrid between a Trumpet Daffodil and a *Tazetta* or *Polyanthus* *Narcissus*; *Odorus*, a natural hybrid between a Trumpet Daffodil and *Narcissus* *Jonquilla*; *Biflorus* is the result of a natural cross between *Narcissus* *Tazetta* and *Poeticus*.

The varieties in this group commence flowering in March, and furnish a succession till May. They are all of elegant beauty, and as cut flowers, are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (see page 4).

 The varieties marked * are not suitable for all cultivated borders, but thrive best under the shade of deciduous trees such as fruit trees, &c., naturalised in grass in shady nooks, or on grassy slopes facing north or north-west.

NARCISSUS INCOMPARABILIS.

The Chalice-Cupped Daffodils or Star Narcissi.

All these make charming pot-plants, while the cut flowers are of great value in decoration. For beds and borders they are very showy, and naturalised in grass few flowers are so graceful and effective.

NARCISSUS INCOMPARABILIS (DOUBLE).

The Double-flowered Nonsuch and Peerless Daffodils.

The large massive flowers of these are greatly prized for bouquets and vases, mixing well with other flowers and foliage in decoration. As pot plants (three to six bulbs in a pot) they are very charming, while in beds, borders, or naturalised, they make a most effective display.

		per doz.		each.	
		s. d.	s. d.	s. d.	s. d.
INCOMPARABILIS PLENUS 'BUTTER AND EGGS' (2), large double yellow rose-shaped flowers, orange-coloured towards the centre, very effective in clumps and masses	per 1000, 35/-; per 100, 4/-	0	8...	...	

INCOMPARABILIS PLENUS 'PRIMROSE QUEEN,' very large primrose-yellow double rose-shaped flowers, shading to orange-yellow towards the centre. We have not yet grown this ourselves, but found it in a friend's garden, where it looked remarkably fine and distinct	per doz.	each.	s.	d.	s.	d.
.....per 100, 30/-	4	6...0	6			
INCOMPARABILIS PLENUS 'EGGS AND BACON' (syn. Orange Phoenix) (3), large double rose-shaped flowers, white with rich orange centre, very beautiful	per 100, 9/6	1	6...0	2		
INCOMPARABILIS PLENUS 'CODLINS AND CREAM' (syn. Sulphur Phoenix) (3), large double pure white rose-shaped flowers with sulphur centre, very chaste and much prized for bouquets, vases, &c., <i>extra fine</i>	per 100, 35/-	5	0...0	6		
INCOMPARABILIS PLENUS 'WHITE QUEEN' (3) , a purer white than 'Codlins and Cream' and very beautiful. This we also found growing in same garden as 'Primrose Queen,' and it appeared to be a really good and distinct plant. We have not yet grown it in our trial grounds	3	6	

NARCISSUS BARRII.

Star Narcissi with Shortened Chalice Cup.

The beauty of these varieties renders them of great value for indoor decoration, 3 or 5 bulbs in a 5-inch pot, while for beds, borders, and naturalisation they are very highly prized.

CONSPICUUS (4), a flower of great beauty and refinement, and a favourite with all, large broad spreading yellow perianth, broad short cup, conspicuously edged bright orange-scarlet, *extra fine*, 1st Class Certificate, R.H.S. We can highly recommend this variety to every one as it is certainly the Queen of Daffodils, and lasts longer in water when cut than almost any other variety; it is a robust strong grower and a very free bloomer. (See Illustration, page 10.)

For *Narcissus Minutiflorus*, see page 24.

DAFFODILS.—GROUP III.—PARVI-CORONATI (Baker).

THE SMALL-CROWNED DAFFODIL or TRUE NARCISSUS, which includes BURBIDGEI AND POETICUS (THE PURPLE-RINGED POET'S DAFFODIL); BIFLORUS (THE PRIMROSE-PERLESS DAFFODIL); POLYANTHUS OR MANY-FLOWERED NARCISSUS (HERMIONE AND HELENA OF HAWORTH); GRACILIS, SCHIZANTHES ORIENTALIS, AND SWEET-SMELLING JONQUILS.

DISTINGUISHING CHARACTER.—Crown less than half as long as the divisions of the perianth.

In this series, *Poeticus* (the Poet's Daffodil) is the flower popularly called the *Narcissus*; *Burbidgei* is a hybrid between *Incomparabilis* and *Poeticus*, and is the connecting link between Groups II. and III. *Biflorus* is Parkinson's Primrose-Peardless, a hybrid of *Tazetta* and *Poeticus*. *Gracilis* and *Tenuior* are the Helena of Haworth; *Jonquil* the Jonquilla of Linnæus; *Polyanthus Narcissus*, the Hermione of Haworth and *Tazetta* of Sibthorp.

The early-flowering *Poeticus* varieties commence flowering in March, and the late-flowering varieties close the Daffodil season in June. *Burbidge's* hybrids of *Poeticus* flower in succession from March to middle of May. *Gracilis*, *Schizanthus orientalis*, and the Double White Gardenia-flowered Daffodil are among the latest to bloom. The cut flowers are greatly in demand for bouquets, vases, and buttonholes.

NARCISSUS BURBIDGEI.**Hybrid Poet's Daffodils or Star Narcissi.**

These with their light and graceful habit and beautiful blossoms are much valued as pot-plants (3 to 6 in a pot), and for vases, bouquets, and buttonholes; in beds and borders they are specially attractive, while naturalised in grass few plants are so beautiful.

The *Burbidgei* *Narcissi* differ from *N. Poeticus* in the cup of the flower being a trifle longer; the early forms commence flowering before *Poeticus ornatus*, and continue flowering in succession, one variety after another, from March to the middle of May.

BURBIDGEI (3), perianth clear white, cup margined with cinnabar-red, *very early*, and much prized for cuttingper 1000, 25/-; per 100, 3/- 0 6... ..

NARCISSUS POËTICUS.**The Purple-ringed Poet's Daffodil or Star Narcissus.**

Poëticus divides naturally into *early* and *late*-flowering varieties. It is from the early section, especially Poëticus ornatus, that Covent Garden is supplied with forced cut flowers from January to March.

Referring to, the great beauty of these Poet's Daffodils when naturalised, Mr. William Robinson writes: 'Four years ago I cleared a little valley of various fences. Through this runs a streamlet, and we grouped the Poet's Narcissi near it, also in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture such as one might see in an Alpine valley.'

March and April Early-flowering Section.

Very beautiful for indoors, 5 bulbs in a 4- or 5-inch pot. Charming in beds and borders, while naturalised in grass, they present in spring a most lovely sight.

Special Notices.

Orders.

We shall esteem it a favour if our Customers will kindly use the Order Sheet that accompanies this Catalogue, and be particular to fill in the full postal and rail address, as sometimes Orders reach us without either name or address, and it is impossible to trace the senders.

Free Carriage of Bulbs.

All **Prepaid Orders** for Bulbs, over 5s. in value, will be sent **Carriage Paid**. Orders not prepaid, if over 10s. in value, carriage may be deducted at settlement of account.

Prepaid Orders.

Besides sending **Prepaid Orders** 'Carriage Paid,' we allow 1s. in the £, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order.

Cash Discount 5 per cent.

1s. in the £ discount may be deducted from all accounts when paid within 14 days from date of invoice. Accounts due nett Christmas and Midsummer.

Remittances.

Money Orders and Postal Orders to be made payable at Covent Garden Post Office; these and all Cheques should be crossed 'London and County Bank.' Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages.

Boxes, Bags, &c., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and a notification should be sent by post, stating date of despatch and name of Railway Company.*

Catalogues.

Our **Seed Guide**, containing a full descriptive list of our matchless Flower and Vegetable Seeds, is published in January, **Hardy Plant Catalogue** in February, **Daffodil and General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Daffodil Notices.

Our Nurseries, Long Ditton.

Visitors invited during Spring to see our magnificent Collection of Daffodils in bloom. The Nurseries are easily reached by the London and South-Western Railway to **Surbiton Station**, and from thence 1/- cab fare to the 'Pound Farm' entrance to our Nursery.

Cut Daffodil Flowers.

When in bloom out-of-doors, cut specimens of Daffodils, correctly named, we forward post-paid at a moderate charge, to cover attendant expenses, thus offering a good opportunity to those who wish to extend their knowledge of these lovely flowers of Spring. If a list of the varieties possessed by the sender is enclosed, such sorts will be omitted. *A remittance should accompany the order.*

1 flower each of 12 sorts, 1/6; 1 each of 25 sorts, 3/6; 1 each of 50 sorts, 6/-
3 flowers „ 12 „ 3/-; 3 „ 25 „ 5/6; 3 „ 50 „ 10/6

Cut Daffodil flowers (without names) **in variety, for decoration,**
4/6, 5/6, & 7/6 per 100.

Naming Daffodils.

Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 2s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Long Ditton, Surrey.

Daffodil Prizes.

For *Daffodil Prizes*, offered for **Competition, Spring 1899**, see back cover.

Notices to Our Foreign and Colonial Correspondents.

Prepayment necessary.

Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an 'order to pay'* on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Particulars of Freight.

India.—Seeds and Bulbs can be despatched to all postal towns in India, by Parcel Post, at the rate of 1 lb. for 1s., and after the first lb. 8d. per lb. up to 11 lbs., or by 'Eastern Express,' at 6d. per lb. up to 30 lbs., after 30 lbs. cheaper as cargo.

Australia and New Zealand, per 'Eastern Express,' at 6d. per lb. (minimum 2s.) or per Parcel Post at 6d. per lb. (1s. being charged for the first lb.). We recommend the Parcel Post to be used where possible, parcels thus sent being delivered at the Customer's house quicker, and without any additional charges.

Shipping, &c.

In **Shipping Bulbs and Plants** to India, Australia, New Zealand, America, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.

Barr's Silver Daffodil Cup.
